Koshi batten detail

Profile: Rectangle 85X170

Weight: 8.201 kg/m
Batten thickness: 1.8mm
End cap thickness: 5.8mm
End cap: Coloured ABS plastic

Endcap detail 1

1	End Caps	Screw fix or apply exterior grade adhesive (Sikaflex) to secure cap to batten.									

Koshi Batten Installation Guide 1 2

- Aluminium can be damaged if mishandled. Never strike directly with a hammer or rubber mallet. Use a pine plank between the striking rubber mallet and the extrusion to avoid surface damage or denting.
- Cut aluminium with a drop saw using an aluminium blade.
- Always cap ends of extrusions with supplied end caps or a flashing to avoid moisture ingress.
- Metal end caps (painted) must be screwed to the extrusion.
- All end caps can only be applied to straight 90 degree cuts. They cannot be applied to angle end cuts.
- Ensure appropriate screws are used to suit the substrate you are fastening to. It is important to use stainless steel or bi-metal screws for all metal surfaces impacted when fastening (i.e. furring channels, top hats, steel frames). This will prevent galvanic reaction between the screw/substrate and aluminium extrusion.
- Fasten at maximum 1 metre spans. Please contact Covet for further information.
